

Verification and Validation

→ Validation:

- ✚ "Are we building the right system?"
- ✚ Does our problem statement accurately capture the real problem?
- ✚ Did we account for the needs of all the stakeholders?

→ Verification:

- ✚ "Are we building the system right?"
- ✚ Does our design meet the spec?
- ✚ Does our implementation meet the spec?
- ✚ Does the delivered system do what we said it would do?
- ✚ Are our requirements models consistent with one another?
